Award-winning teacher transitioning into a career as a software engineer. As a caring teacher, developed creative solutions related to curriculum and instruction. Likewise, developed resources to aid in the teaching process; for example, programmatic tools to enable the tracking, calculating and analysis of student data. Completed an intense full stack development course through LaunchCode, taught by some of the industry's most experienced and respected individuals. Continuing to hone skills both independently through individual study and collaboratively through LaunchCode's Liftoff program.
